

Ticketing Terminal

Automate pickup or delivery sites while introducing an array of operational and safety benefits. These terminals allow drivers to create or complete a records of shipment within FR8Works. Reducing the required labour to administer and process paper tickets.

When combined with the P3 ticket printer and process integration to your scale, the system provides automated ticketing with legal for trade weights, electronic BOL's and improved site safety by keeping the driver in the truck.

Shipments update live in the cloud as they are created, transported, and delivered. All shipment records and BOL's can easily be accessed and exported from FR8Works.

- Reduce Time on Site & Maximize Scale Efficiency
- Same Day Invoicing
- Electronic Bill of Lading (ebol)
- Drivers Stay in the Truck
- Physical Integration with Gates, Lights & Valves
- Confirmation of Delivery App
- Utilizes any Barcodes or RFID

The Other Guys

What Their System Won't Do

Next Generation Scale Ticketing

Faster, More Accessible Delivery Records...

Delivery records are managed in the cloud, utilizing the FR8Works dashboard. See deliveries update in real time as trucks arrive or leave the facility and access records instantly. Along with time efficiency, eliminating manual entry methods mitigates human error and the potential for identity or load fraud.

FR8Works saves accounting departments time and money by doing away with hand written paperwork.

- No more missing, illegible or fraudulent tickets
- No more waiting, invoice the same day
- Verification of delivery

Improved Safety for Drivers & Site Personnel

Automation of the paperwork process has added benefit of increased site safety. Drivers using FR8Works stay in their trucks for the entire duration of the delivery. This reduces the chances of the most common on-site injuries such as collisions, slips, trips & falls.
